RE: DENATALE JR., JOHN

To Whom It May Concern:

Mr. DeNatale was seen initially by myself on November 14, 2003 with a history of coronary artery disease, myocardial disease, angina pectoris and status-post a defibrillator.

The patient had a cardiac catheterization suggesting significant severe coronary obstructive disease.

In view of the above, the patient underwent bypass surgery here at St. Francis by Dr. Paul Damus approximately three and a half weeks ago.

At this particular point, he is recovering with an anemia and chest pain, incisional.

The patient was last seen December 12, 2003.

In view of the above, I would not recommend that the patient undergo myelogram at this point. The patient at this time is still into the early recovery period following bypass surgery.

Should further information be required, I would be happy to provide such.

Sincerely,

Bernard B. Monteleone, MD, FACC

:
: **DECISION ON PETITION**
: **TO MAKE SPECIAL**
: **(APPLICANT'S HEALTH)**
:

This is a decision on the petition filed September 17, 2002 under 37 CFR 1.102 (c) to make the above-identified application special under the procedure set forth in MPEP 708.02, Section III: Applicant's Health. There is no fee for this petition.

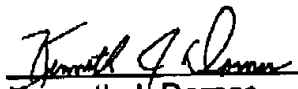

A grantable petition to make an application special under 37 C.F.R. 1.102(c), MPEP 708.02, Section III requires evidence that the state of health of the applicant is such that he might not be able to assist in the prosecution of the application if it were to run it's normal course.

The petition includes a medical certificate from the applicant's doctor dated August 27, 2002 attesting to the fact that the applicant was diagnosed with ischemic cardiomyopathy with significant arrhythmias. It is therefore evident that the applicant might not be able to assist in the prosecution of the application due to the diagnosed illness if said prosecution were to run it's normal course.

For the above stated reasons, the petition is GRANTED.

The examiner is directed (1) to make an interference search for possible interfering applications; (2) to promptly examine this application out of turn; and (3) if any interfering application is discovered, to examine such application simultaneously and state in the first official letter of such application that it is being taken out of turn because of a possible interference.

Petitioner is advised that this application will continue to be special, throughout its entire prosecution and pendency, including interference and appeal, if any, only if petitioner makes a prompt *bona fide* effort, in response to each Office action, to place the application in condition for allowance, even if it is necessary to conduct an interview with the examiner to accomplish this purpose.

RE: John DeNatale, Jr.
App. # 101128620
Filing Date: 4/23/02

To Whom It May Concern:

I am writing to you on behalf of a patient of mine, John DeNatale, Jr., who has recently submitted an application to your patent office. Mr. DeNatale is presently under my care for a chronic, debilitating cardiac condition known as ischemic cardiomyopathy with significant arrhythmias, which necessitates both rehabilitation and medical treatment.

I am writing to you to see if there is any way to expedite review of his application due to his debilitating illness.

If I can be of further assistance, please do not hesitate to call me.

Sincerely,

Janice McCormack, M.D.

Petition to make special

I recently sent in a Refilling
of an earlier application. NEW #
10/730/225. PLEASE make this
Application special like the last
one # 10/128/620.

Enclosed is a letter from my
heart doctor stating I had 5 way
bypass surgery recently. My
condition is getting worse. Also
inclosed is the 1st letter granting
my case being special along with
a letter from my first heart Dr.
Please if possible process ASAP.
Thank you for your help in this
matter.

John DeNatale Jr.
